

Figure 32: View north back side of barn and last addition to barn.

Figure 33: View up and east showing the relatively new framing for the rear loafing shed and the finished exterior wall of the south side of the barn.

Recommendations

These recommendations are based on the archival research and site visit to both the park and the adjacent property.

1. HPIF's should be completed for:
 - i. The buildings associated with the operations of the golf course.
 - ii. The three buildings at 7310 240th Street SE.
2. When plans for the proposed park development are underway all areas that will have ground disturbance associated with the proposed development should have an archaeological field survey to determine if any buried resources will be affected by this project.

Thank you for the opportunity to provide cultural resource management services for this project.

Regards,

Kelly R. Bush
Equinox Research and Consulting International Inc. (ERCI)
